AMENDMENTS TO CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1-13. (canceled)

14. (previously presented) An apparatus comprising:
an open-faced housing configured to hold at least one disk containing digital media; and,
said open-faced housing having an outer width slot comprising at least one further indented
width slot wherein said open-faced housing is formed into a disk bundle package.

15. (previously presented) An apparatus comprising:
an open-faced housing configured to hold at least one disk containing digital media;
said open-faced housing having an outer width slot comprising at least one further indented
width slot; and,
said open-faced housing further comprising a conical indentation to hold a writing implement.

16-18. (canceled)

19. (previously presented) An apparatus comprising:
an open-faced housing configured to hold at least one disk containing digital media; and,
said open-faced housing having an outer width slot comprising at least one further indented
width slot wherein said open-faced housing is formed into a computer monitor mount open
faced housing and wherein said computer monitor mount open-faced housing is located on
the reverse side of a monitor mounted paper holder.

20-22. (canceled)

23. (currently amended) An apparatus comprising:
an open-faced housing configured to hold at least one disk containing digital media; and,
said open-faced housing having an outer width slot comprising at least one further indented
width slot wherein said open-faced housing is formed into a mailer; and,
said open-faced housing further comprising a disk storage indentation covering said outer width
slot.

24. (currently amended) An apparatus comprising:
an open-faced housing configured to hold at least one disk containing digital media; and,
said open-faced housing having an outer width slot comprising at least one further indented
width slot wherein said open-faced housing is formed into a mailer; and,
said open-faced housing further comprising a disk storage location positioned on a reverse side
of said ~~outer width slot~~ mailer, on an opposite side in which said outer width slot is located.

25-27. (canceled)

28. (previously presented) An apparatus comprising:
an open-faced housing formed into a mailer wherein said open-faced housing is configured to
transport at least one disk containing digital media;
said open-faced housing having at least one slot configured to hold said at least one disk; and,
said open-faced housing further comprising a disk storage indentation covering said at least one
slot.

29. (currently amended) An apparatus comprising:
an open-faced housing formed into a mailer wherein said open-faced housing is configured to
transport at least one disk containing digital media;
said open-faced housing having at least one slot configured to hold said at least one disk; and,
said open-faced housing further comprising a disk storage location positioned on a reverse side
of said ~~at least one slot~~ mailer, on an opposite side in which said at least one slot is located.

30. (original) A method comprising:

placing a disk in a disk width slot wherein said disk width slot is further indented into an outer width slot; and,

placing a thin case in a thin case width slot wherein said thin case width slot is further indented into said outer width slot.

31. (original) The method of claim 30 further comprising:

removing said disk from said disk width slot;

removing said thin case from said thin case width slot; and,

placing a thick case in said outer width slot.
